VILLA POLOS

Posted on Νοέμβριος 8, 2024

Villa Polos was designed and constructed custom by LYKOS Engineering & Development. It's uniqueness lies that it is the first 'dry construction' project completed in the Porto Cheli region. Furthermore, it is one of the first ''Box Type'' houses built in the area, an architecture that has shaped into a new trend in recent years. The villa overlooks the beautiful Porto Cheli harbour and the entrance to it. It has very quick access Porto Cheli and is approximately just 2km away from Kranidi. The plot is very spacious allowing for desired landscaping and green areas. Villa Polos is an ideal home for those who have a modern taste and appreciate a uniqueness in style.
